Joseph T. Roviario joined Luke Transportation Engineering Consultants in January 2001 with over twenty-six years experience as a transportation planner.

His areas of expertise include traffic operations and impact studies, DRI analysis & monitoring, impact fee analysis, as well as corridor and concurrency studies. Having worked on projects throughout the State of Florida, with an emphasis in Central Florida, Mr. Roviario is well versed in all local and regional transportation issues. His experience has included both public and private projects.

Mr. Roviario has experience in several disciplines: transportation planning, traffic impact studies, and transportation review. His experience includes small scale and large scale transportation impact studies, signal warrant studies, alternative transportation impact fee studies, and access analysis. In addition, he continues to be the consultant of record for a number of Central Florida municipalities.

As Director of Transportation Planning, Mr. Roviario is responsible for all aspects of project management for traffic impact analysis studies, transportation concurrency studies and project master planning.
